DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Kubo et al. (US 6456279).

Kubo discloses (figs 11-12) a display apparatus with a n interlayer insulation film provided on a substrate covering recesses and projections and a display device on the interlayer insulation film, the insulation film comprises a flattening insulation layer made from an organic compound-containing material and formed in the condition of embedding the recesses and projections, and a coat layer consisting of an inorganic material and formed covering the surface of the insulation layer.

Regarding claim 2, Kubo discloses the device is an organic electroluminescence device.

Regarding claim 3, Kubo discloses the flattening insulation layer is made from a coat film.

Regarding claim 4, Kubo discloses the insulation layer is made from a resin material.

Regarding claim 5, Kubo discloses the interlayer insulation film is provided with a contact hole reaching to a lower layer of the film and the coat layer is provided in the condition of covering the side circumferential wall of the contact hole.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakajima et al. (US 6518594) discloses a state of the art display.
